No Bots/Artificial Intelligence

You must not use bot software or artificial intelligence, whether commercially obtained or privately developed, when playing any of our games. 'Bots' are software programs or other devices which interfere with the game, which need little or no human action. Bots may use rules or artificial intelligence to make playing decisions. We will actively look for such software on the player's machine subject to the player's consent. Consent will also establish that the player will not interfere with any of the detection mechanisms. This clause applies regardless of whether the bot is actually used in conjunction with the games or otherwise.

No Prohibited Software

Other types of software are also prohibited, these include but are not limited to software which:

1) Gives you any sort of unfair advantage.
2) Shares hole cards among players or assists collusion or cheating in any way.

3) Utilizes a database of hands or player profiles which is shared between players.
4) Reduces or eliminates the need for a human to make decisions (for example, tools which automatically fold specific starting hands).
5) Is designed to datamine (i.e. gather hands or player profiles from the game client beyond which the player has observed from their own play) for any purpose whether personal or commercial. This also applies to any data which has been obtained by datamining, whether the data was obtained by the player themselves or by anyone else. You are furthermore prohibited from sharing any legitimately gathered data with other players.
6) Provides real-time advice on the action to take during play (including ICM analysis tools)
7) Attempts to block any of our fraud and cheating detection mechanisms.

No Collusion

It is prohibited for players to act as a team, with or without prior explicit agreement, to the actual or possible detriment of other players in the game. You must:

- Always play in your own best interests
- Not work together with another player to gain an advantage
- Not 'soft play' against friends – i.e. You must play against friends with the same technique/tactics used with people you are not acquainted with
- Not 'chip dump' – i.e. you must not intentionally lose hands or manipulate the gameplay in order to transfer funds to any other player
- Not share card information with any other player
- Not play in the same game or any player in which they have a financial interest - i.e. they should not play in the same games as anyone with whom they have a staking, swap, profit sharing or bankroll sharing agreement;
